Check-in

Real Time Sync

✱ The app syncs every check-in across all connected devices in real-time.

1 guest of VIP list checked in

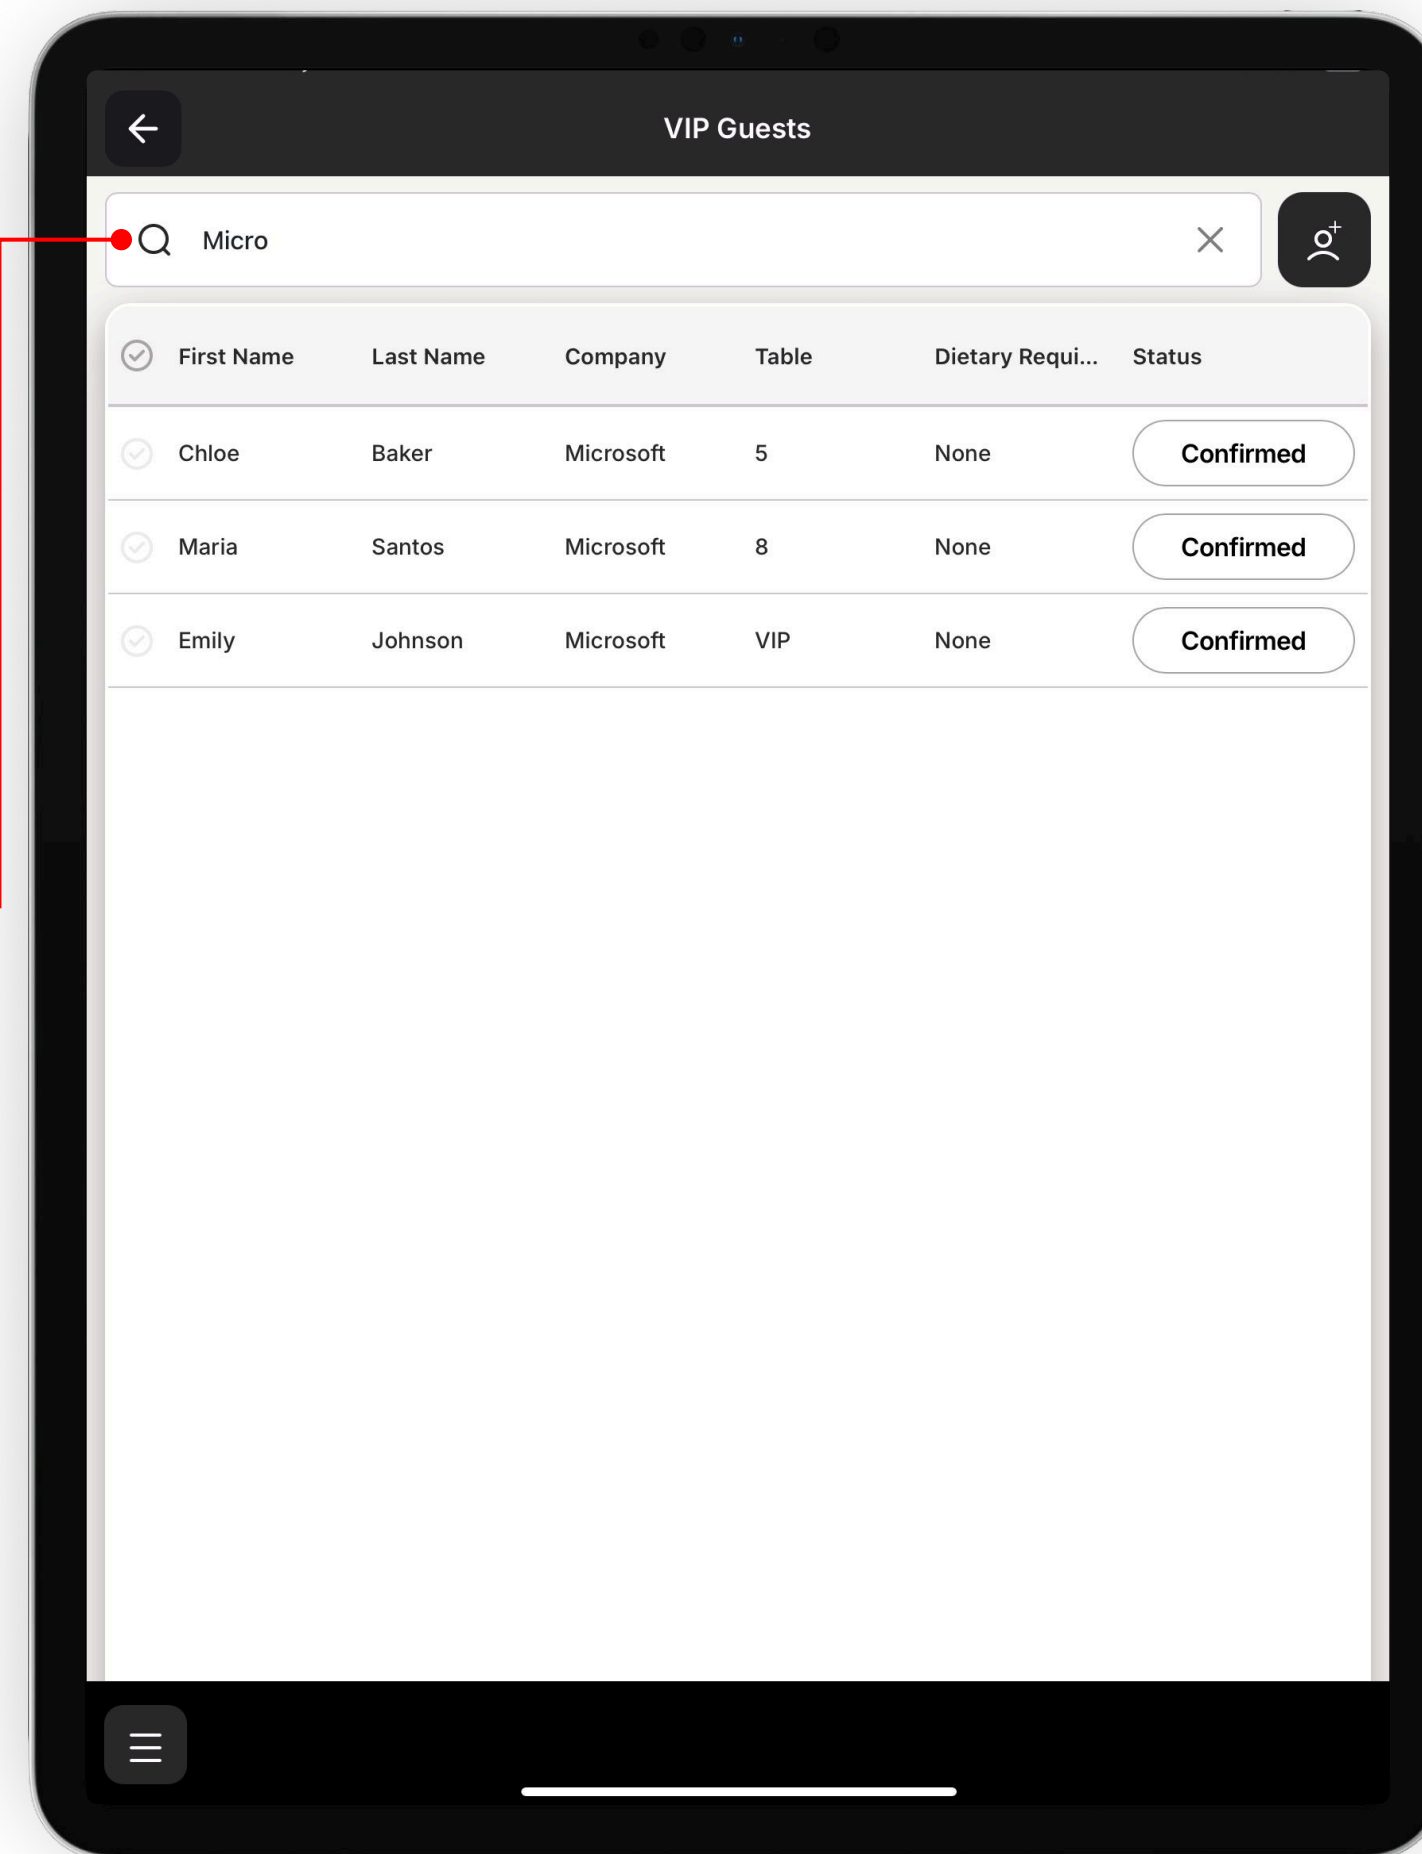

Full-text Search

Smart Guest Search

Tip

The dynamic full-text search allows you to find quests by typing the first few letters of their names, phone numbers or company names - or use a combination of search terms for a perfect match.

Search for guest names, companies and any other guest information

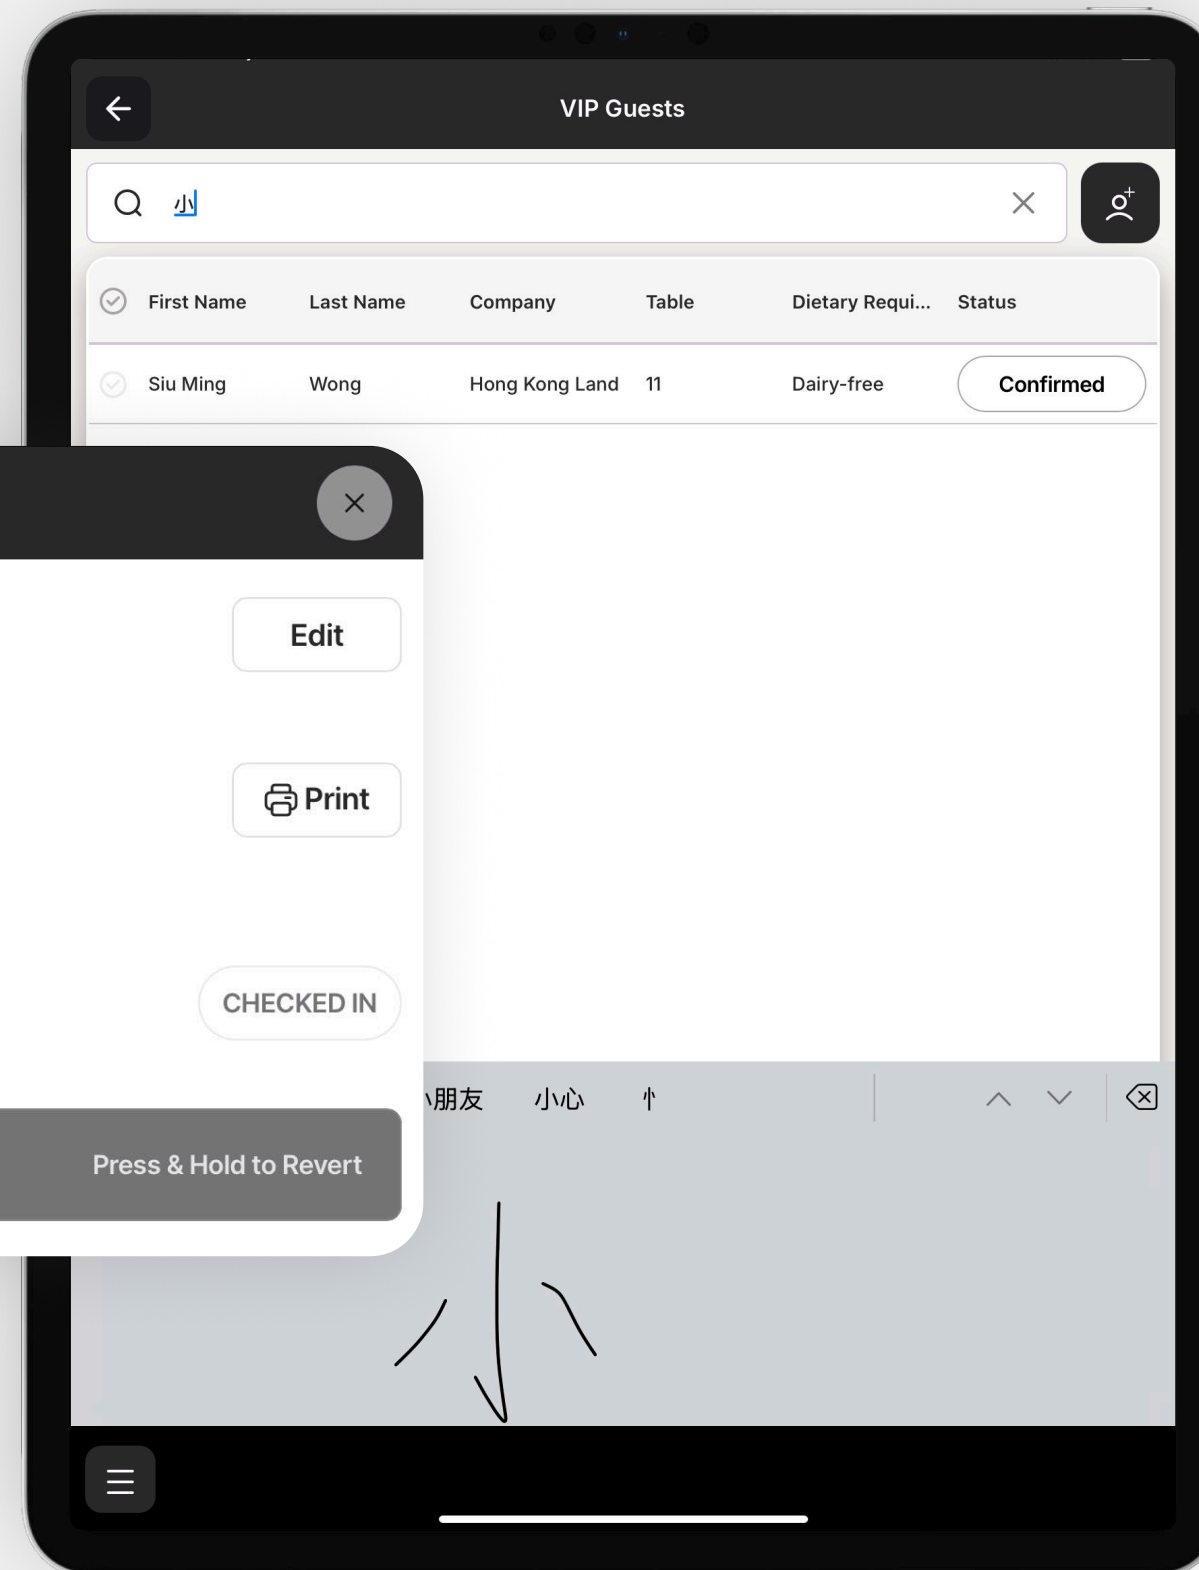

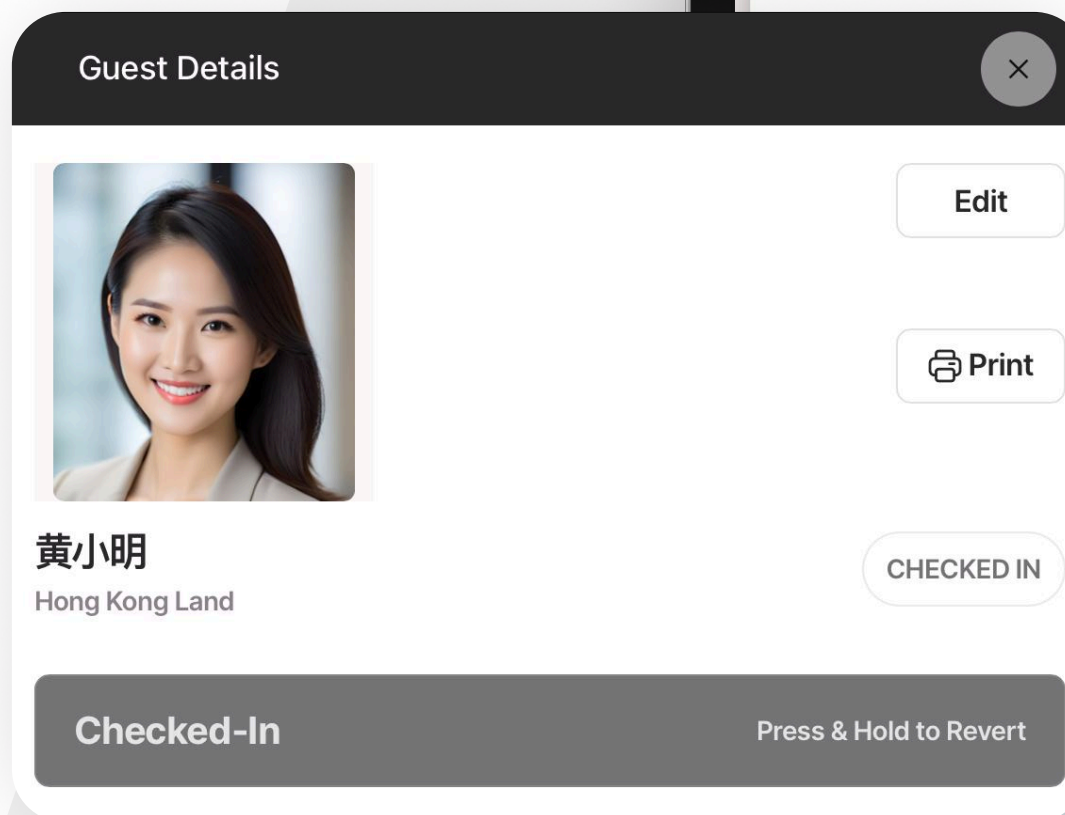

Multilingual Search

Chinese Names

Upload Chinese names and use your preferred keyboard to search and find guest names in Chinese characters.

Fully multilingual:

Works in Chinese (Simplified & Traditional), Japanese, Thai, and many other languages.

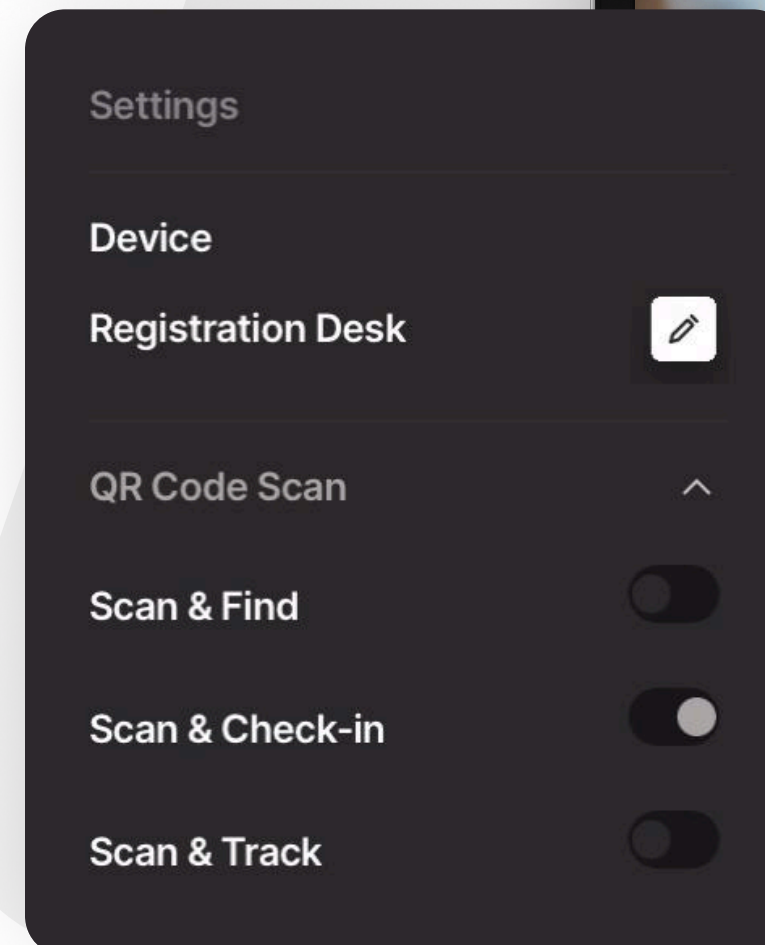

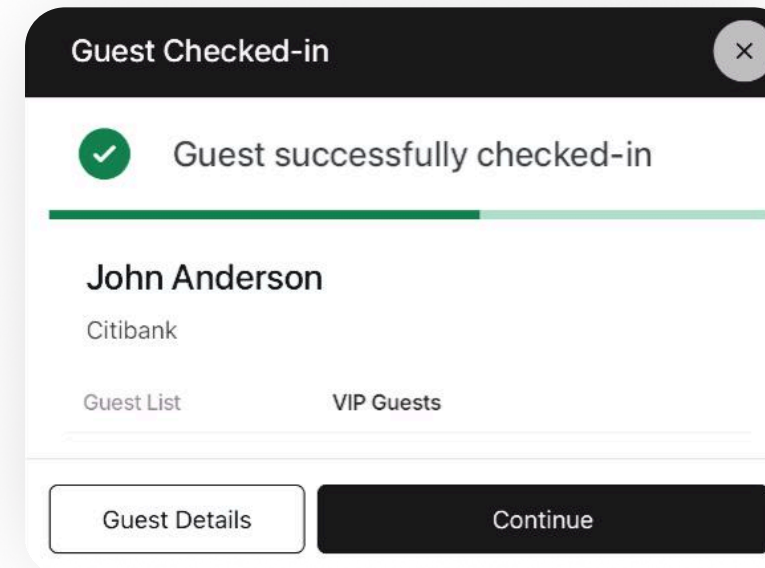

QR Codes

Scan QR Codes

Use the built-in QR code scanner to check in guests instantly.

Simply scan a guest's QR code to find their details - or speed through the process by scanning and checking in multiple guests in seconds.

Capture Guest Details

Add Guests/ Walk-Ins

Easily add guests last minute with instant synchronization across all devices.

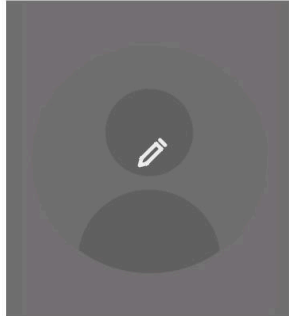

Or use it to register walk-in guests on-site.

Tip

Set up walk-in-specific guest data fields.

Check-In

Additional Guests

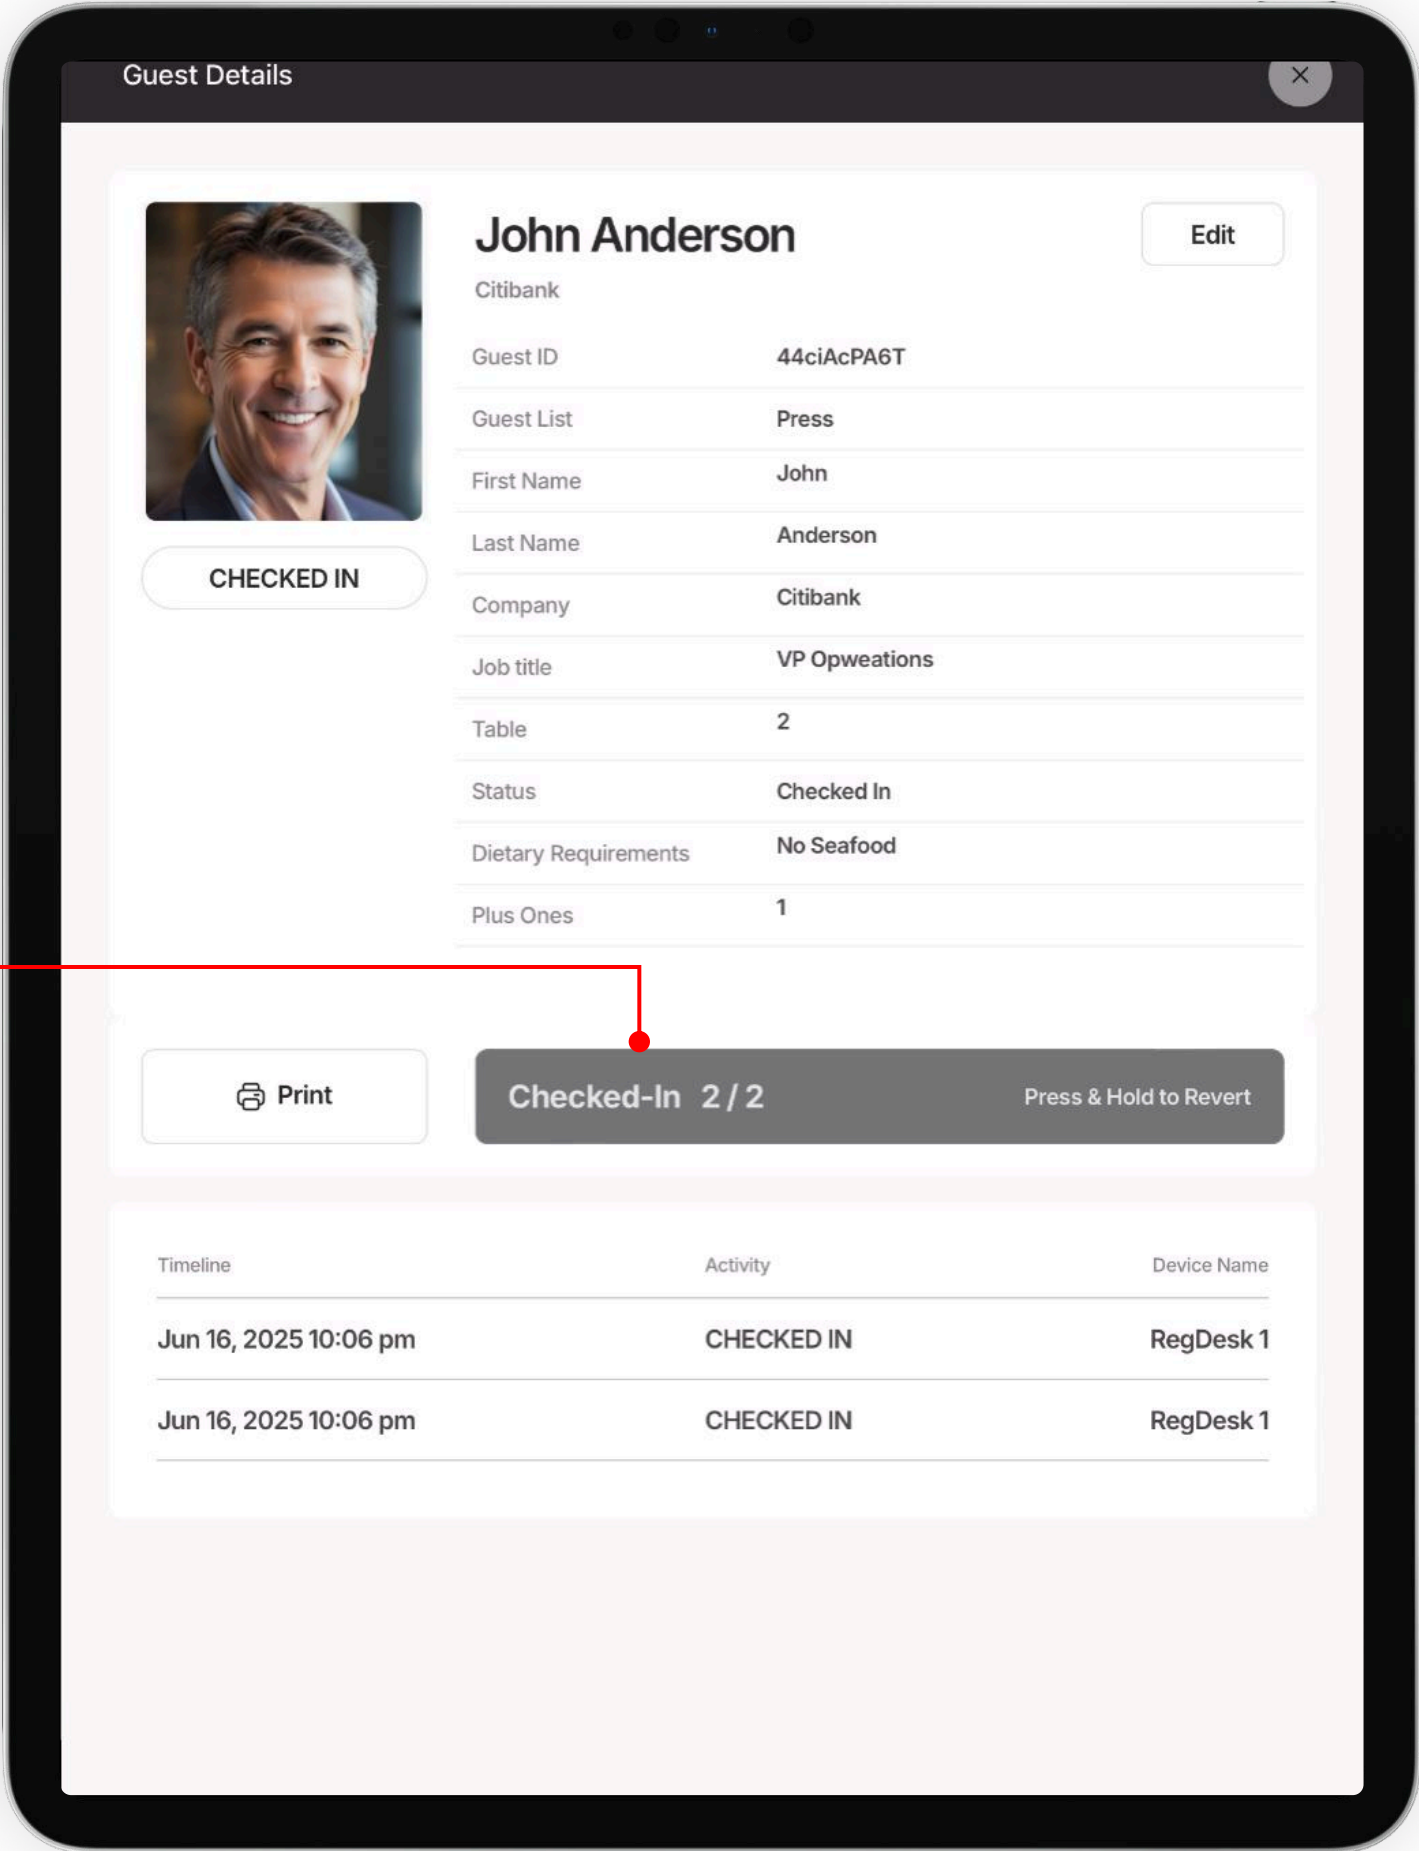

Check-in Plus One(s)

Manage unnamed guests by specifying which plus ones each attendee can bring to the event.

Tap the Check-in Button multiple times until all guests have arrived.

The timeline displays all check-ins in the order they occur, offering clear visibility at the entrance.

2/2 Guests checked in

Track Daily Attendance

Multi-Day Check-ins

With the easy to use Multi-day Check-in feature, you can set up multiple check-ins that appear as additional buttons for each day or activity of your event, allowing guests to be checked in for Day 1, Day 2, and more, complete with a timestamp.

This also works perfectly for managing various sub-events like luncheons and dinners, eliminating the need to re-upload guest lists or navigate complex session management for consecutive days.

Create and rename additional Check-in buttons to track multiple check-ins for each guest.

Checked-in

Real-Time Statistics & Instant Reporting

Get real-time statistics of check-ed in guests for each guest list. Updated information syncs across all connected devices, from your Phone to iPads used at the check-in counter.

Download the full check-in report into Excel/csv immediately after you close the registration desk.

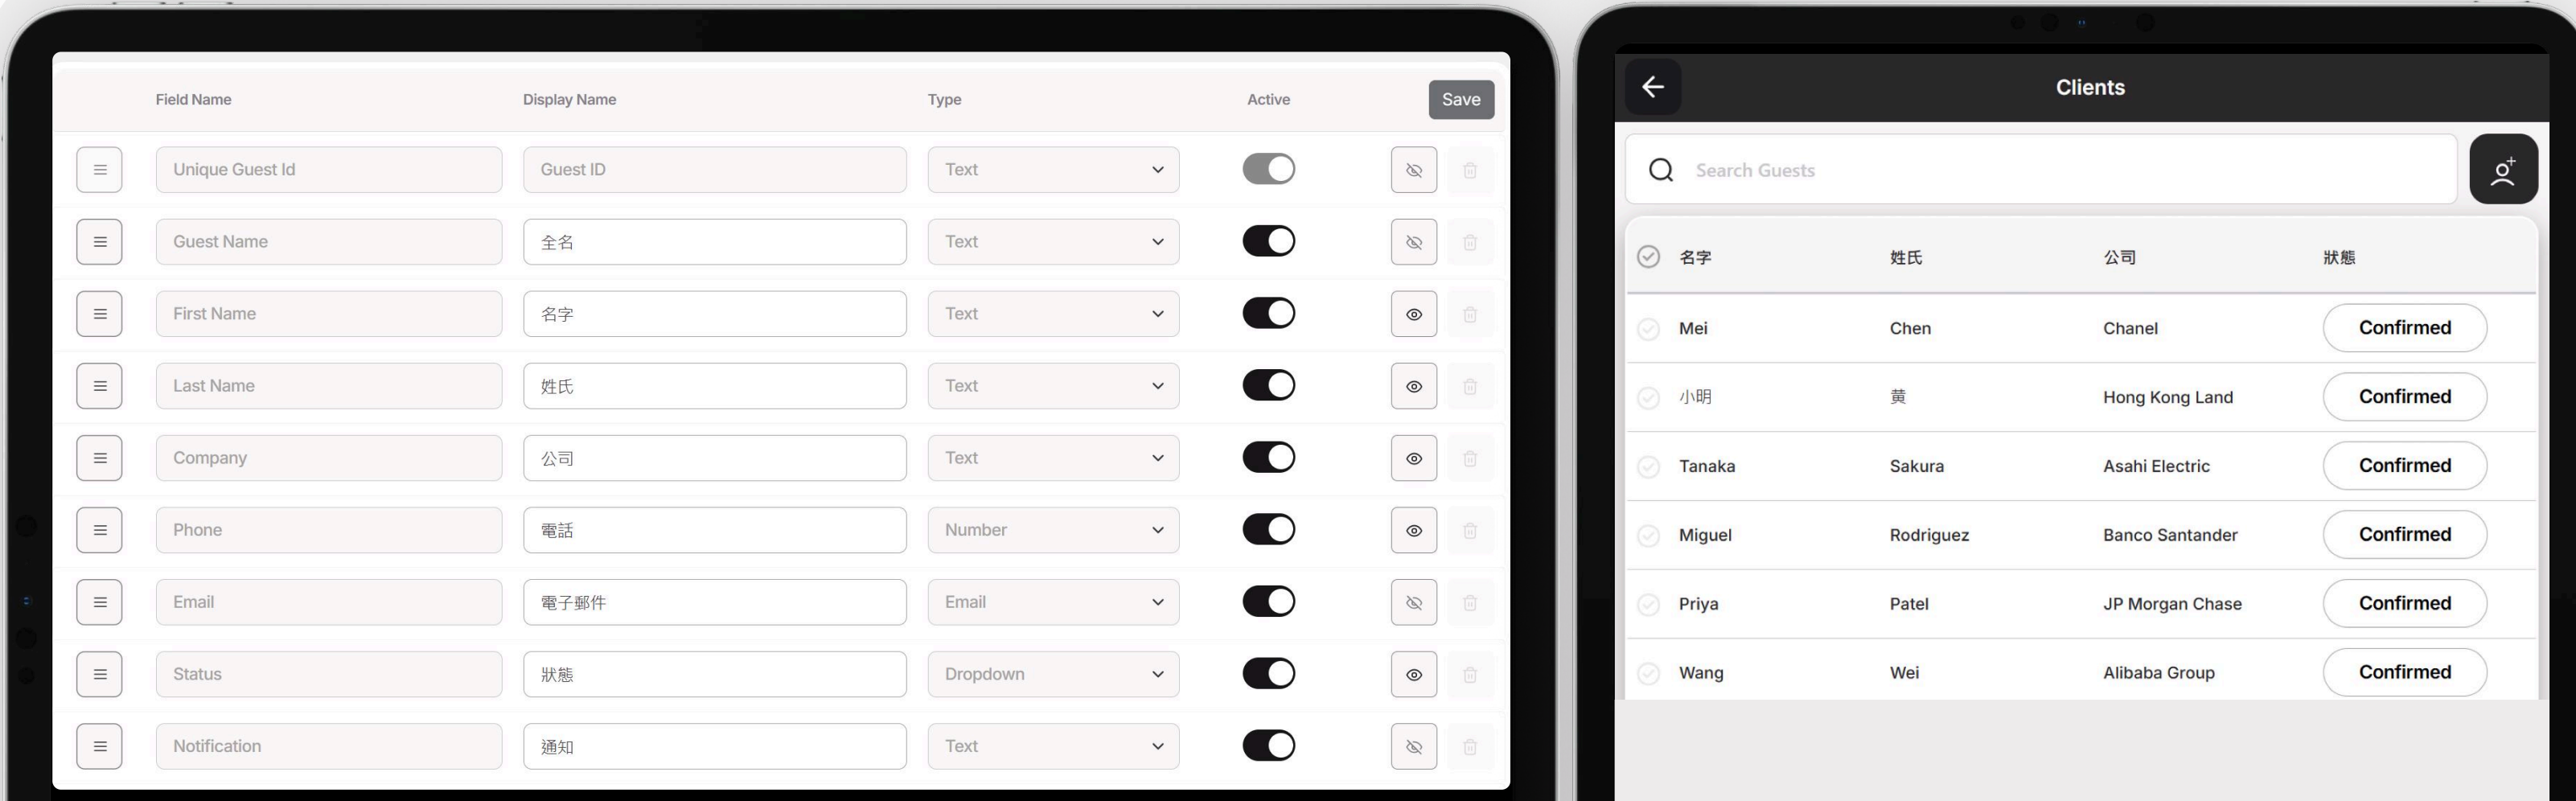

Full Planning Flexibility

Customize The App

Re-order and rename guest fields to customize the App to your event, guest list and language.

Highest Data Security Standards

Strengthen your Event Compliance with Check-in Pax. We invest heavily in network and application security to make sure your guest data is safe with us.

[Download Security Whitepaper](#) ↗

Hosting on AWS

Check-in Pax utilizes Amazon Web Services (AWS) for robust security and flexibility when scaling up.

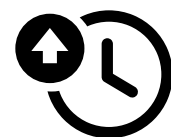

Data Encryption

All data is stored in an encrypted database at rest (AES-256) and transmitted in transit via SSL/TLS.

Data Deletion

In compliance with GDPR's 'right to be forgotten' principle, we offer the option to purge all your guest list data at any time to ensure the complete removal of personal identifiable information.

99.9 % Uptime

With a 99.9% uptime, we focus on maintaining continuous service without any interruptions for your events. [View status page](#).

Role-based Access Control

Role-based Access Control Grant your team members access based on predefined roles and responsibilities, so you can align with the principle of least privilege.

Audit Logging

Check-in Pax features audit logs that give admins visibility into user and team activities, including last login, access rights, and guest actions such as creation, modification, and check-in.
